

Celebrating “Earth Day 2021”

On the theme:

“RESTORE OUR EARTH”

On

April 22nd 2021

Organised by

**Dept. of Geography & Dept. of Analytical and Applied Economics
Utkal University, Bhubaneswar, Odisha**

EARTH DAY:

“Earth Day” observed on April 22 every year since 1970, is a recognition of the dependence of human civilisation on the web of life and life supporting systems provided by mother earth. Human race is currently going through a severe pandemic threatening our existence and worsening the very functioning of our socio-economic relationships across the globe. It is in this context that observing the Earth Day 2021 holds a lot of significance. The present webinar titled "Restore our Earth" is an effort towards expressing our recognition to issues and challenges faced by the mother earth through climate change, global warming, biological disasters, deforestation, ever increasing population pressure, shrinking environmental and economic resources and so on. The theme "Restore our Earth" focuses on human efforts to protect the earth and reducing the damages through greener technologies, planning and implementation of eco-friendly mitigation and adaptation strategies.
