

Research Policy

Utkal University
Bhubaneswar 751004, ODISHA

PREAMBLE

The vision of Utkal University (hereafter referred Utkal or University) is to be a Centre of excellence in higher education with a focus on innovative teaching, learning, research, consultancy, and extension activities for building a creative, enlightened, and productive civil society. Research activities help to create and disseminate new avenues in knowledge, and promote innovation and these will motivate better learning and teaching among faculties and students. It is also the foundation of knowledge that brings new energy, builds state-of-the-art facilities, promotes research publications, develops collaborations, and becomes part of an active community that shares the mission objectives.

Since its inception, research at Utkal plays a pivotal role in the fulfillment of its mandate. In the context of the globalization world and fast-changing scenario of research domains, inter and trans-disciplinary research has acquired greater relevance to address real-world problems.

In view of the above, there is a need to consolidate existing research practices and further strengthen the research capability of Utkal to distinguish itself and enhance its visibility and impact by prioritizing research.

This policy delivers a set of guidelines for the conduct of research at all levels and will promote a holistic and inclusive research ecosystem at Utkal. The Director of R & D will ensure its implementation for executing research at Utkal at all levels. The policy will be updated from time to time as per the advice of research committees and in consultation with the Internal Quality Assurance Cell (IQAC) of Utkal University.

AIMS AND OBJECTIVES OF THE POLICY

This Research Policy outlines the general framework for the development, promotion, and conduct of research of high quality following the principle of research ethics, and consistent with the mission of Utkal. The primary objectives of this policy are as follows:

- Create a conducive environment for a better research ecosystem with action plans to support research activities in the University from time to time.
- Encourage research as an essential aspect of teaching-learning to inculcate research aptitude among the students
- To draw attention towards the priority of local/regional/national interest
- To establish and strengthen the Central Instrumentation Facility (CIF) with high-end equipment and central computation facilities.
- To establish different Centres of excellence (CoEs) to promote interdisciplinary research and collaborations with national and international institutions
- To promote the publication of research findings in quality peer-reviewed, journals, books, and book chapters/monographs.
- Patent and/or commercialize innovative products and processes
- Highlight research achievements and activities to improve the University rankings at the National and International level.
- Strengthen the Research and development cell for strategic plans, management, and monitoring of research programmes and performance.
- Encourage the department/schools and faculty members to generate of funds through sponsored projects.
- Provide an ecosystem for innovation and entrepreneurship.
- Provide support for consultancy, collaboration, and outreach (Extension) activities to enhance the research culture.
- Integrate support for both fundamental and translational research for the generation of new knowledge and product.
- Promoting good practices in data acquisition, storage, and management and upholding the highest standard of ethical conduct in research.
- Appreciation / incentives to the researcher University for quality publications of articles in journals and books; filing/publication of patents; research funding and for other research related achievements.

PURPOSE

The purpose of the Research Policy is to create a vibrant atmosphere of research among faculty and inculcate research aptitude among the students. The policy shall serve as an overall framework within which research activities may be carried out.

It also aims to identify thrust areas of research having social relevance and thereby supplementing the Vision and mission of the University. The Research policy also emphasizes contribution towards society and to the nation at large.

This policy document is expected to address the issues of both basic and applied research, Innovation and technology development and also provide a vision on the type and priority of research to be undertaken for the next ten years.

The overall purpose of this policy is to:

Build/strengthen the core areas of research with good infrastructure for quality research output in arts, humanities, sciences, commerce/management, and other emerging academic disciplines.

Create more awareness among all the stakeholders on the importance of socially relevant and need-based research, and their integration with teaching and extension activities.

Promote innovation and entrepreneurship and leadership culture to enhance value addition to research and visibility.

Administer the policy following the highest level of integrity, ethical standards, and fairness with provision for performance-driven appreciation/recognition.

SCOPE

This Research Policy forms the basics of the research ethics of the University and applies to all stakeholders (Employees, students, and research scholars/associates of the University; chair professor, visiting researchers, adjunct faculty, post-doctoral fellows, and honorary appointee who may be involved in any form of research and/or innovation activity.

RESEARCH AND DEVELOPMENT CELL (R &D)

Research and Development Cell of the university is responsible for the promotion and development of research activities at Utkal, and is headed by Director, R & D. The Cell provides administrative and managerial support for the operation of research programs, sponsored research, consultancy, and related activities of the university. The Cell facilitates interaction with external agencies, both at national and

international levels. The Cell acts as a liaison between the university and funding agency to undertake sponsored projects.

COMMITTEE TO MONITOR & PROMOTE RESEARCH ACTIVITIES

The University has constituted different committees to regulate and monitor the research activities under different categories.

- (i) **University Research Committee:** The highest research body responsible for framing of policy, regulations, and monitoring for the Ph.D. programme of the University
- (ii) **Research Advisory Committee:** It is the highest advisory body constituted with the inclusion of internal and external members from institutions and industries. The committee advises on prioritising the area of research, planning, and execution of different research programmes, and development need-based infrastructures on the campus.
- (iii) **Research Monitoring Committee:** This committee is constituted including the senior faculty members and finance officer of the University to undertake routine monitoring of different research programme.
- (iv) **Departmental Research Committee:** This committee is constituted including the faculty member of the respective/relevant department, a nominee of the Vice Chancellor, and external members. The primary function is to regulate and monitor the doctoral. programme of the concerned subject.
- (v) **Research Advisory Committee for Ph.D. students:** This is a three-member committee to be constituted with a research supervisor/co-supervisor, Chairman, DRC and a nominee of the Vice Chancellor for each Ph.D. scholar and

RESEARCH CATEGORIES

Research at large in Utkal is carried out under three different categories:

- (i) **University Sponsored Research:** University promotes the research at the individual faculty level, group of faculty members at the department, or inter-department research. Every year University identifies, reviews research proposals and funds are sanctioned to carry out research at the individual faculty level, school levels, product design, and development groups (if any),

etc. The details of these are provided in 15(A) funding head to promote research.

- (ii) **Research Programmes:** The University offers doctoral programs to foster research. A separate regulation has been designed for the same
- (iii) **Externally Funded Projects:** The University has set rules to carry out externally funded research and consultancy projects. The faculty as a Principal Investigator (PI) can write and get externally funded research and consultancy projects.

RESEARCH ETHICS

All research carried out shall comply with institutional, national, and international guidelines and principles. All the researchers of the University are expected to uphold the highest standards of ethical conduct, integrity, and honesty in their own research and responses to other activities.

For research involving human and non-human participants, necessary permission needs to be obtained from the Ethical Committee of the University (website address). Besides this, wherever required, the consent of specific ethical compliance should be obtained from the agencies concerned.

Researchers need to ensure that research processes and outcomes will not conflict with the interests of the University or the General well-being of Society. For collaborative research with other institutes, the researchers need to ensure that there is no conflict of Interest with Utkal University and collaborating partners

Due authorship, acknowledgment to the University/funding agencies need to be given in all forms of publications. For Intellectual Property from research in the University, formal permission from the R & D cell of Utkal University is to be taken.

The Research Ethics also covers broader issues such as avoidance or prevention of misconduct, and misuse of University resources besides publication ethics such as data forgery (manipulations and research fraud), plagiarism, simultaneous submission, duplicate publications, and conflict of interest, etc.

CONSULTANCY

- The university encourages faculty members to undertake consultancy research that facilitates the dissemination of knowledge and makes a direct impact on society as a part to fulfil the vision and mission of the University.
- Consultancy Services may be offered to Industries, organizations, service sectors, Government departments, and other National and International agencies in the areas of expertise available with the faculty of the University.
- Prior approval of the University authority is mandatory for taking any type of consultancy research and must be undertaken as per rules outlined in the consultancy policy of the University (Annexure-I).

PUBLICATIONS AND INTELLECTUAL PROPERTY RIGHTS (IPR)

- All research documents and publications should use the correct affiliation in the credit/address tag lines in the published versions as books, book chapters, technical reports, research papers, and articles
- The faculty members and researchers will have the right to decide about the publication of their individual or collaborative findings. External sponsors (if any) have to be given due credits.
- While recognising the need for researcher to protect their own research interests and to seek protection for any intellectual property identified during the course of research, the University encourages its researchers to be as open as possible in discussing their work with other researcher and with public.
- Once the results have been published, the University expects researchers to make the relevant data and material to other researchers, on request, provided that this is in consistent with any ethics approval and contents which cover the data and materials and any intellectual property right in them.

GENERAL POLICY AND GUIDELINES FOR RESEARCH

Requirement to Undertake Research:

The academic staff and research personnel including research scholars/RA/PDFs etc. are expected to undertake research to strengthen the research capacity, greater visibility and recognition of the University at National/International levels, and also to contribute to society in various domains for achieving the mission objectives of the University. Nothing in this policy is to be construed so as to prevent the head of the departments/Institute from allocating teaching and other responsibilities in the light of the Research record of academic staff.

Obligations of researchers:

Faculty members must be aware of their obligations to staff and students working as part of the research team and vice-versa. Each member of the research team (student, faculty, and other research staff) is responsible to know about the research problem, and relevant health and safety procedures of that area of research, and for management of those procedures in all workplaces.

For sponsored projects, the guidelines of funding agencies should be followed in all activities including engagement of research staff and submission of utilization certificates, statements of expenditures, and project reports

To promote Academic transparency, each research staff has the right to know about the research sponsoring agency, their methodologies, and the salary or stipend status.

University Research support:

University provides seed grants to its faculty to enable the researcher to carry out preliminary work which could be utilized for attracting extramural research funds or for specific works leading to quality publications/patents/ products. The seed grant is provided as per the availability of funds and the quality of the work.

The University may also provide fellowships to research scholars under various schemes from time to time.

The University will consider the publication grant to researchers to promote publication in high-impact journals.

Travel grants as per the availability of funds will be provided to students and faculty for the presentation of papers, resource persons, and chairing the session at national/international conferences. Leave as applicable will be granted for such participation will be granted.

All types of University research support will be provided on the basis of the recommendation of the appropriate committee and subject to the availability of funds and cannot be taken as a right of researchers.

The University establishes Research centres/institutes to raise the Research profile of the University, focus strengths in areas where there is (or the University wishes to develop) a concentration of Research excellence (including areas of applied

Extramural funding:

UU encourages staff to attract research grants from external funding agencies (SERB, DBT, DST, ICSSR, UGC, CSIR, and others) both at individual and department levels. Any researcher fulfilling the eligibility criteria of funding agencies is free to apply proposals for external funding. Intra/inter-department collaborations or external collaborations, wherever required, may be taken. All types of research proposals must be routed through the respective Head of the department; Chairperson, P.G. Council; Director, R & D, and Registrar, Utkal University for onward transmission to the funding agencies. Departments, as per their eligibility, are also encouraged to apply to funding agencies (DST, DBT, ICSSR, UGC, etc.) for departmental infrastructural and research grant

Publications of results:

UU encourages to publish the research results in good quality journals indexed in Scopus/ Web of Science/ PubMed or UGC-approved journals. Author(s) may decide on the journals depending on the quality of the work. A copy of the publication (soft/hard) must be submitted to the IQAC cell for the record. In all publications, the publication ethics including ethics of authorship (authorship as per contribution toward the research work), Ethical approval as per requirement (if any), Plagiarism, research misconduct (Data manipulation, research fraud), simultaneous submission, duplicate publication, conflict of interest), must be followed.

Centres of Excellence (CoEs)

The University establishes several Centres of Excellence (CoEs) under RUSA 2.0 and Odisha Higher Education Programme for Excellence and Equity (OHEPEE) to promote interdisciplinary research in focused areas and raise the research profile of the University. They serve as vehicles for engaging with other Research institutions and industries and facilitate interdisciplinary and multidisciplinary relationships.

Intellectual property Rights (IPR)

Utkal University encourages, facilitates, promotes, and safeguards scientific investigations and research in the form of Intellectual property Rights (IPR). The IPR

cell of the University promotes the patenting culture, helps in filling the patent, and makes provisions for meeting all the expenses related to the filing of patents. The guidelines framed by the IPR cell are applicable to all researchers for IPR.

Collaborations/MoUs

Utkal University encourages faculty members for collaborations/MoUs with other institutions (National/International) for undertaking research of mutual interest, joint projects, and student and faculty exchange. In all MoUs with other institutions or Industries, adherence to the objective and values of Utkal must be ensured.

Guidelines for Consultancy Assignments

Utkal University

5/15/2022

The provisions within this document cover all the departments, Centre of Excellence (CoE), Special Project vehicles (SPVs), full-time and part-time members of staff. Where appropriate, pro rata arrangements apply for part-time staff

1. Purpose

As a national centre of academic excellence, the Utkal University is, through its staff, a respected source of academic and professional expertise, which extends beyond the bounds of research and teaching activity as normally defined. Further, the University recognises and encourages the benefits that accrue to the institution as well as to the individuals concerned from engagement with industry, commerce, public sector organisations, Government bodies and areas of professional service which consultancy can provide. These benefits lie in the enhancement of the academic/professional discipline, which derives through knowledge transfer, practical application and experience. The purpose of this document is to define the procedures to be used for the management of consultancy activities by staff. It is intended to foster interactions with external stakeholders while protecting the interests of both the University and its staff in a manner that reflects appropriate professional standards.

2. Scope

The provisions within this document cover all the departments, Centre of Excellence (CoE), Special Project vehicles (SPVs), full-time and part-time members of staff. Where appropriate, pro rata arrangements apply for part-time staff.

3. Definitions

Consultancy:

For the purpose of these procedures, Consultancy is defined as the provision of advice of any kind, information, acting as subject matter expert for an external organisation or other professional services for a commercial fee. Key features of consultancy and services rendered activities are:

- I. Application of existing know-how or expertise of department, COE, SPV, staff or a small group of staff, rather than the creation of new knowledge
- II. Focus is on the client's specific business or products
- III. Similar services could be provided by the private sector
- IV. Financial structure that recovers in excess of the salary and direct costs and a reasonable proportion of overheads
- V. The outputs are confidential to the client
- VI. Neither the University, nor its department, COE, SPV or staff, seeks rights to publish the outputs or reuse them in their research or education activities.

Expert witness work is governed by the same rules as any other consultancy. Typically consultancy is solely based on the existing 'know how' of a department, COE, SPV, staff member or a small group of staff. It does not involve the use of physical resources of the University, such as laboratories, reagents, technical staff, bespoke computer programmes (beyond access to common knowledge resources such as the library, literature, email and widely-available computer programmes). The outcome is often confidential to the contracting body, and neither the University nor its department, COE, SPV or staff seeks rights to publish the outputs or reuse them in their research or education activities. Consultancy is distinct from activities in which University facilities or resource of any kind is used in carrying out the work. These activities are therefore outside the scope of this document. Such activities are:

a. Service Work

This involves the provision of analytical, testing or other services for third parties involving any use of University facilities, equipment, IT research capabilities, data sets of any description and associated staff resources. Typically the work is initiated/co-initiated by and confidential to the contracting party, which owns the outputs including any IP generated. The activity may or may not produce new knowledge. The University would not normally seek rights to publish the outputs or to reuse them in their research or education activities. Such activities should be arranged through the Utkal University Consultancy Cell.

b. Contract Research with industry and other 3rd parties

This involves research initiated and funded by commercial (or occasionally non-commercial) organisations outside the conventional governmental, public sector, charitable and other sources of research funding. It includes active research or the use of University resources beyond the 'know how' of the principal investigator. The outcome is typically confidential to the contracting body which owns the results including any IP. The University would not normally seek rights to publish the outputs or to reuse them in their research or education activities. Such activities should be arranged through the through the Utkal University Consultancy Cell and treated as 'industry research'.

c. Collaborations with industry and other 3rd parties

Research collaborations with commercial partners is funded by industry but arises from mutual interest of University and industry staff. Again, this includes active research and/or the use of University resources beyond the 'know how' of the principal investigator. The outcome may be shared with the University and its staff, as may be any resulting IP. Nevertheless, such activities should be should be arranged through the through the Utkal University Consultancy Cell and treated as 'industry research'. Such collaborations should include costs for the principal investigator's time which should not normally be claimed on a consultancy basis. The terms should be arranged through Utkal University Consultancy Cell.

Exceptions from Consultancy:

a. Scholarly work for external clients

Examples are set out below of external work which is closely linked to the academic role and purpose and/or forms part of wider academic endeavour. In practice, any contractual and modest payment arrangements (e.g. honoraria) are between the external organisation and the individual staff member directly (e.g. non-commercial organisations or bodies, professional societies, other academic institutions or academic publishers), in respect of the activity:-

- I. Reviewing or editing scholarly outputs for journals and other published academic media
- II. Appearances in the media, e.g. television, or articles for general media publication, e.g. newspapers
- III. External examining duties for other institutions or professional bodies
- IV. Acting in an advisory role for a publishing house, Research Council, Funding Council or charity, or their committees, or professional body associated with the individual's role.
- V. Lecturing or other presentations at academic conferences
- VI. Arts performances g. Authorship of, or royalties from, the publication of books

b. In-company training, custom programmes (ExecEd) CPD, short courses etc.

The majority of course programmes, and certainly the credit-bearing course programmes of the University, advance the University's educational charitable purpose and clearly do not meet the definition of consultancy. For any non-credit bearing education programmes (e.g. online courses for external release, noncredit bearing Continuing Professional Development courses) and custom programmes, the University is required to consider the educational merit of the training/course programme, in terms of whether it satisfies the principles of public benefit education or, whether it is educational consultancy. Where a commercial course sponsor takes ownership of material developed, or the material is wholly unique to that commercial customer, it will be treated as educational consultancy and any such activity must be arranged through Utkal University Consultancy Cell. Contracts for provision of courses outside the University should also be negotiated by Utkal University Consultancy Cell.

4. Negotiation and Management of Consultancy Activities

Utkal University Consultancy Cell is a wholly owned consulting division of the Utkal university. The cell's remit is to lead the University's interactions with industry at all levels from consultancy, through contract and collaborative research with industry to IP, licensing and company formation. All university consultancy activity must be negotiated through Utkal University Consultancy Cell in order to:

- I. Protect the University's charitable status
- II. Safeguard staff and the University against legal and financial risk

- III. Ensure transparency and consistency of treatment for all staff who engage in consultancy in a manner that reflects appropriate professional standards.

Utkal University Consultancy Cell will offer services to external clients seeking specialist help from within the University and actively seeks to create opportunities for members of staff who wish to participate in consultancy. It provides negotiating and contractual services to the University and its staff to support and enable consultancy work. Consultancy contracts are tripartite between Utkal University, anchor department / CoE/ SPV/ faculty and the client. Utkal University Consultancy Cell also leads on behalf of the University in the negotiation and contract stipulation for all industry engagement, including provision of services and contract research.

5. Aims of the Procedures for Consultancies

These procedures are intended to address the following aims and concerns: -

I. Legal and financial risk:

The nature of consultancy work is such that individuals and the University may be exposed to legal and financial risk especially with regard to the possibility of claims for damages on the grounds of professional negligence. The application or otherwise of insurance provisions, the contractual obligations and the consequences for the individual and for the University, must be clearly understood so that this risk is minimised.

II. Conflict of Interest:

There is a need to ensure that both the University and the anchor department / CoE/ SPV/ faculty member(s) are protected from the difficulties which may result when the interests of each are, or could be construed as being, in conflict. This arises most obviously in situations where the individual, in the course of his or her employment with the University, has privileged access to opportunities which would lead directly to the individual's personal financial gain or that of any connected person, or where the individual is in a position to influence the University's relationship with an outside body which, in turn, could lead to similar gain. In order to avoid such situations there is an obligation on the part of the individual to declare potential conflicts of interest and to seek advice and an obligation on the University to provide such advice. Anchor department / CoE/ SPV/ faculty member(s) must always act in accordance with the University's Conflict of Interest Policy.

III. Relationship between Consultancy activities and University duties:

While acknowledging the benefits derived from consultancy, individually and institutionally, a balance must be struck and maintained to ensure that these are not gained at the expense of University duties, and that the University is not exposed to unacceptable risks. Please note that where staff undertake

consultancy as their primary role, the arrangements for and the duration of such work and the extent and division of income will vary from those detailed in this procedure.

IV. Consultancy income and costs:

The rules and mechanisms for the allocation of consultancy income require to appropriately reflect the range and nature of costs which may be incurred by an Anchor department / CoE/ SPV/ faculty member(s) and by the University in the course of a consultancy.

6. Approval for Consultancy

For consultancies, approval must be obtained in advance from the Vice Chancellor, Registrar, Comptroller of Finance, Head of Department, Head of CoE/SPV, Head of Utkal University Consulting Cell as appropriate, or the person formally delegated by them to deal with such matters. This approval should include written agreement in respect of: -

- I. The nature of the proposed consultancy task
- II. The proposed timetable for the consultancy
- III. The details of University facilities or resource to be consumed (beyond email, core IT programmes, access to the library)
- IV. The consultancy fee to be charged (plus expenses)
- V. pre-agreement on the distribution of money

In seeking approval, the Anchor department / CoE/ SPV/ faculty member(s) must also disclose any outside activity, relationship or interest (including any financial interest), which might give rise to a conflict of interest (See section 5. ii above). In areas of doubt, there is an obligation to seek advice from Utkal University Consulting Cell by contacting the relevant Consultancy Manager.

I. Signature:

All Consultancy contracts should be signed by Vice Chancellor, Registrar and head of the anchor department/ head of the CoE/ SPV or the faculty member(s) concerned..

II. Consequences of non-compliance:

These procedures are in place to protect both the University and its staff. Non-compliance may constitute a disciplinary offence. If this policy is not followed any tax arising will be charged to the department of the responsible party.

7. Duration and extent of Consultancy

I. For faculty / PhD & PDF scholars in Department / CoE:

Where approval is given to undertake consultancy work under the provisions of this document a member of staff should not spend more than an average of one day per week during a teaching semester, on consultancy activities. The total should not exceed ninety days in a full academic year. In the unusual event of an individual wishing to develop his or her consultancy activities beyond this point, movement to reduced hours (and salary) is an option that can be considered. It is the responsibility of the Head of Department, to ensure that the proposed consultancy does not conflict, in nature or extent, with the University duties of the member of staff concerned. As part of this procedure the written consent of the relevant Head of School (or other relevant officer as above) is obtained in relation to each consultancy.

II. For non-academic staff / resource persons in CoE / SPV

There will be no stipulated time frame for duration of the consultancy assignment. The Head of the CoE / SPV will monitor the workload and progress of the core work along with the consulting assignment.

8. Fee rates and pricing

Utkal University Consultancy Cell will produce guidelines annually on suggested fee rates that may be earned by University staff for consultancy work.

Utkal University Consultancy Cell will normally carry out all pricing negotiations with the client. If a member of staff wishes to negotiate the total price (i.e. the gross income, exclusive of GST), for the transaction directly with the client, this should be reviewed by Utkal University Consultancy Cell at the earliest possible opportunity and before any final terms are agreed. Early involvement of Utkal University Consultancy Cell is recommended to help ensure that the fees to be charged reflect the market value of the services to be provided.

In agreeing the price, the following principles must apply: -

- I. Prices charged to clients should not be below those charged by commercial organisations carrying out similar work.
- II. The total price charged should reflect a fair return to the member of staff, the School and the University for Resources used directly. For example, the total price charged to the client must account for costs in the following areas: -
 - Consultant's fee
 - Travel and subsistence
 - Any other identifiable direct costs, e.g. secretarial services, IT/Library costs

- Utkal University Consultancy Cell costs

The implications for the Consultant and for the University in Income liabilities in respect of their fees earned should be discussed with Utkal University Consultancy Cell and dealt with before any price is discussed with the client.

9. The Consultancy contract

Consultancy contracts will usually be prepared using the standard contract terms, which will be drawn up in collaboration with the University's legal advisers, insurance advisers and auditors. Utkal University Consultancy Cell will maintain and regularly update these contracts and can provide draft documents upon request. In every case where a client's contract is used, Utkal University Consultancy Cell's legal advisers must first have agreed its terms before they are presented for signature.

10. Division of income

After the deduction of any direct costs the standard division of fee income is as follows: -

- Individual member of staff / consultant: 70%
- College / School / Centre: 15%
- Utkal University Consultancy Cell: 15%

The division of fee income between the staff member and the School may be varied by local agreement at the point the contract is drawn up. Variations will only be made by agreement among the Consultant(s) and their Head of Department, Head of CoE/ SPV as appropriate. In respect of a staff member's share of fee income (70% or less, subject to variation by agreement), it is then possible for a Consultant to elect to 'forego' or 'waive' all, or a proportion of fee income and nominate a School or Centre account for the funds to be allocated to. Any such formal waiver must be entered into Utkal University Consultancy Cell the consultancy invoice to the client.

11. Payment Arrangements

The University will authorise Utkal University Consultancy Cell to issue invoices in respect of consultancy and other services rendered. Utkal University Consultancy Cell will issue such invoices and will also be responsible for arranging for payments to be made to Consultants and to the College, Schools or Centre. Payments due to members of Utkal University staff will normally be made through the University's Payment Section, who will make appropriate deductions before including the net amount payable in the appropriate monthly salary payment. Payments to University staff will not be released before money in respect of the consultancy invoice have been received from the client by Utkal University Consultancy Cell.

12. Private Consultancy

The University discourages employees from private consultancy as this exposes the University, and the member of staff, to unwarranted risks without indemnification. Private consultancy occurs when a member of staff enters into a consultancy arrangement with a third party: -

- Other than in the course of his or her employment with the University, and
- In his or her 'own time', and
- There is no conflict of interest or such a conflict has been disclosed appropriately and either eliminated or properly managed, and
- Which does not consume any University resources, and
- In which the individual does not represent the University, and
- From which the University receives no financial benefit. Such consultancies are the responsibility of those staff who enter into them, and they must understand that no cover is provided by the University's Professional Indemnity Insurance provisions.

However unless certain steps are taken the University could still be exposed to the attempted pursuit of claims in delict (whether or not by vicarious liability). As an institution that derives most of its income from public funds, it is especially important that the University minimises its exposure to such risks.

A member of staff undertaking a private consultancy does so at his/her own risk and without any approval from the University. If a member of staff chooses to undertake a private consultancy, the member of staff must: -

- I. Use only their home address for all contractual and other correspondence relating to the private consultancy.
- II. Include the following disclaimer in all correspondence, including publicity and advertising materials such as websites, relating to the private consultancy: -

Please note that the services are provided by [insert name of member of staff] acting in a personal capacity. [Insert name of member of staff] is not, and shall not be deemed to be, acting as agent or employee or representing in any way the Utkal University. Accordingly, you and your company, by accepting the services, (i) acknowledge that the Utkal University has no responsibility or liability for the services and (ii) is deemed to have waived any right or entitlement to pursue or instigate any claim or action against the Utkal University for any injury, loss or damage you or your company may sustain as a result of [insert name of member of staff] undertaking the services for you or your company.

- III. Not use Utkal University headed paper or a University address in any contractual and other correspondence relating to the private consultancy.

- IV. Not use a University email account or University web page in promoting or undertaking the private consultancy.
- V. Not seek legal advice from the University's solicitors, or the Utkal University Consultancy Cell legal team in respect of the contractual terms of a private consultancy.

Failure by a member of staff to comply with any of the foregoing requirements will result in the University taking appropriate action, which may include initiating disciplinary proceedings, or raising a legal action to recover any financial loss incurred.

13. Suggestions

Under the aegis of RUSA 2.0 (Ministry of Education, GoI), Utkal University, Bhubaneswar, Odisha has set up a business incubator under Utkal Entrepreneurship and Career hub, christened as 'Centre for Innovation and Incubation' (CII) for promotion of startups and creating a thriving ecosystem for entrepreneurship development and innovation. The Centre for Agri Management (CAM) has been appointed as the partner institution of this SPV. Centre for Innovation & Incubation (CII – Utkal) located in the University campus has started its operation from 1st Sept, 2021. CII has been envisaged to offer a host of services to the budding start-ups ranging from pre incubation, incubation, acceleration, co-working spaces, seed funding, advisory support, mentoring support, market linkage, training and hand holding. Thematically, although the key technology focus areas for CII are Agriculture, Food Processing, and allied sectors, it will also incubate and nurture any good Science based innovative idea which has commercial potential. Presently, the centre has boarded 13 startups under its Udyam Incubation Program. The Centre has also on boarded 5 startups into the Pre Incubation (Upakram) Programme along with 6 more student startups in the month of March and April, 2022. CII-Utkal has forged collaborations with more than 15 private and government institutions for promoting and nurturing startups of different domains.

In the wake of Centre for Innovation & Incubation being registered as a Section 8 company, it is proposed that the centre is authorized by Utkal University as the nodal agency for facilitating consulting agreements. The Centre has resource persons having considerable experience in the consulting domain and can act as a facilitator for the above mentioned sections of this document.
